MOTION FOR LEAVE TO FILE BRIEF AMICI CURIAE

Amici Curiae U.S. Representative Mark Pocan, U.S. Senator Cory A. Booker, and four other members of the U.S. House of Representatives respectfully request this Court to grant leave to file an *amicus curiae* brief in the above captioned case.

Due to the congressional power to delegate authority to administrative agencies, including the United States Department of Agriculture, *amici* have both a special interest in and the unique ability to speak to the issues in this case. Both parties in this case planned for the likely submission of *amicus* briefs. Plaintiffs' counsel have consented to the admission of this brief and Defendants' counsel have chosen to take no position.

As detailed in the following brief, the Court should grant the Plaintiffs' motion and vacate Defendants' New Swine Inspection System rules.

BRIEF OF AMICI CURIAE

28	Brief of <i>Amici Curiae</i> Case No. 4:20-cv-00256-JSW

1 || Interest of Amicus Curiae

Amici are a United States Senator and five Members of the United States
House of Representatives concerned with the rules promulgated by the United
States Department of Agriculture ("USDA") in its New Swine Slaughter Inspection
System ("NSIS"). The full list of *amici* is included in Appendix A. When Congress
delegates authority to an agency, it retains an interest in ensuring the agency does
not exceed that authority, so as to protect the separation of powers.

In this case, USDA promulgated rules related to meat inspection that run contrary to the congressional intent and purpose of enacting the Federal Meat Inspection Act ("FMIA"). The FMIA instructs USDA to protect public welfare through monitoring meat safety. *Amici*, as both members of the legislative branch and representatives of the people in their states and districts, have an interest in ensuring that agencies do not promulgate rules that disregard legislation aimed at protecting public welfare and that jeopardize their constituency.

Summary of Argument

USDA's NSIS rules are inconsistent with the congressional intent and purpose of passing FMIA and are therefore invalid as *ultra vires*. Congress passed the FMIA to protect consumers from contaminated food products by ensuring independent federal inspection of those goods. *E.g.*, 21 U.S.C. § 602, 603. The NSIS rules issued by USDA's Food Safety and Inspection Service ("FSIS") contradict that purpose. The NSIS increases risks for consumers by delegating core components of ante-mortem inspection to the slaughter plants' own employees, without even requiring proper training for those individuals, and lessening the opportunity to perform post-mortem inspections by increasing line speeds. 9 C.F.R. §§ 309.19(a)-(b), 310.26(b)-(c) (2019); Modernization of Swine Slaughter Inspection, 84 Fed. Reg. 52,300 (Oct. 1, 2019) (promulgating the NSIS rules). FSIS's disregard for consumer Brief of *Amici Curiae*

welfare, and in particular the ways in which its rules undermine the inspection
 process, abandons the primary purpose of the FMIA.

3 Because the NSIS is inconsistent with the intent and purpose of the FMIA, its rules are unlawful. "[F]or agencies charged with administering congressional 4 $\mathbf{5}$ statutes, both their power to act and how they are to act is authoritatively prescribed by Congress, so that when they act improperly, no less than when they 6 7 act beyond their jurisdiction, what they do is *ultra vires*." City of Arlington v. FCC, 8 569 U.S. 290, 297 (2013). Indeed, "the question — whether framed as an incorrect 9 application of agency authority or an assertion of authority not conferred — is 10 always whether the agency has gone beyond what Congress has permitted it to do," *id.*, which is the case here. Administrative policymaking "inconsistent with a 1112statutory mandate or that frustrate[s] the congressional policy underlying a statute" is unlawful. NLRB v. Brown, 380 U.S. 278, 291 (1965); see also, Schneider 1314v. Chertoff, 450 F.3d 944, 952 (9th Cir. 2006). The NSIS rules are invalid as ultra 15*vires* because they decrease consumer protection, both by diminishing federal 16oversight and by hampering crucial food safety protections, contrary to the FMIA's 17legislative purpose.

18 19

Argument

20

21

1. Congress passed the FMIA to protect consumers from unsafe meat, ensured through federal oversight.

The legislative intent behind the FMIA is consumer protection secured
through government supervision. All rulemaking under the auspices of the Act
must reify that intent, not undermine it.

Congress passed the FMIA to "protect the health and welfare of consumers."
21 U.S.C. § 602. The drafters repeatedly emphasized that purpose, referring four
times to protecting consumers in the Statement of Findings alone. *Id.* The

28 Brief of Amici Curiae Case No. 4:20-cv-00256-JSW

1 Statement continued that not only was Congress enacting the FMIA because of the $\mathbf{2}$ central role meat had in "the Nation's total supply of food," but also because Congress believed if it "protected ... the health and welfare of consumers," it would 3 simultaneously aid "livestock producers and processors," food "markets," and the 4 "public welfare." Id. Congress stated that ensuring meat is "not adulterated, and $\mathbf{5}$ 6 properly marked, labeled and packaged," would create consumer confidence and 7 "eliminate burdens upon" the meat industry generally. Id. Consumer protection was 8 both an end goal of the FMIA, and the means by which it would accomplish its other 9 goals of benefitting farmers, meat producers, and the general public good.

10 Unsurprisingly, central to this scheme was a comprehensive system to review 11and certify animals and meat products meant for consumption. The FMIA directs 12"inspection of all amenable species before they shall be allowed to enter into any" slaughterhouse, *id.* § 603(a), as well as "post mortem examination and inspection of 1314carcasses and parts thereof," id. § 604; see also § 605, § 615. Indeed, the Act directs 15that "inspectors shall have access at all times, by day or night" to ensure this review." Id. § 606(a); see also § 609. Following the inspector's review of the animals, 1617inspectors also oversee meat labeling to further promote consumer confidence in the 18items they are purchasing. Id. § 606(a), 607, § 611(a); see also § 617 (requiring "any 19vessel" carrying meat for export to obtain "a certificate that the [] amenable species 20were sound and healthy at the time of inspection, and that their meat is sound and 21wholesome").

Core to the review and approval process that Congress designed was that the inspectors would be independent federal officers whose allegiance would be to enforcing the FMIA, not to the plant's bottom line. The FMIA emphasizes that its inspection regime is to be carried out by inspectors "appointed" by the Secretary of Agriculture "for that purpose." 21 U.S.C. § 603(a) (regarding pre-slaughter inspection); *see also* § 604 (same regarding post-mortem inspection); § 621 (similar).

28 Brief of Amici Curiae Case No. 4:20-cv-00256-JSW

Likewise, Congress explained the labeling process is to be carried out by "said 1 $\mathbf{2}$ inspectors," which it defined to be those "appointed" by the Secretary "for that 3 purpose." Id. § 606(a); see also id. § 617 (explaining certificate for sale in foreign country must be provided by "an inspector appointed under the provisions of this 4 chapter"). Underscoring the intent (and need) that the inspectors be independent, $\mathbf{5}$ 6 Congress emphasized that the inspectors must be able to "refuse to provide 7 inspection" or "cause inspection to be temporarily suspended" and thereby stop the 8 slaughter process. Id. § 603(b) (regarding violations of humane methods of 9 slaughter); § 606(a) ("the Secretary may remove inspectors from any establishment 10 which fails to so destroy [] condemned meat food products," preventing the products from being labeled as compliant). Moreover, Congress created criminal penalties if 1112the corporations that inspectors supervise seek "to influence" inspectors' decision 13making, and equivalent penalties for inspectors who accept such bribes, as they would be violating their duties as an "officer or employee of the United States." Id. 1415§ 622.

16The history underlying the FMIA confirms that Congress set out to protect 17consumer welfare through the independent federal oversight of the meat supply. In 18the lead up to passage of the FMIA, President Theodore Roosevelt transmitted a 19letter to the Agriculture Committee along with an investigative report that, in the 20President's words, "shows the urgent need of immediate action by the Congress" to 21pass this consumer protection legislation. *Hearings Before the Committee on* 22Agriculture, Conditions in Chicago Stock Yards, Message from the President of the 23United States, Transmitting the Report of Mr. James Bronson Reynolds and 24Commissioner Charles P. Neill, Special Committee Appointed to Investigate the 25Conditions in the Stock Yards of Chicago, 59th Cong., 1st Session, Doc. 873, 261-63 26(1906) [hereinafter *Conditions*]. In particular, he emphasized the need for Congress 27to develop a system of "thoroughgoing inspection by the Federal Government of all

stock yards and packing houses and of their products," because at that time the
national government had "no power to enforce inspection" of meat products. *Id.*(emphasis added). As the President explained, "It is imperatively necessary in the
interest of health and decency" that Congress pass a law "which will enable the
inspectors of the General Government to inspect and supervise from the hoof to the
can the preparation of the meat food product." *Id.* at 261-62.

7 Indicating that the Department would inspect the meat to ensure safe food, 8 the President advised Congress to pass a law that "will enable the Department of 9 Agriculture adequately to inspect the meat and meat food products entering into 10 interstate commerce." Id. He explained that the federal government needed to "supervise the methods of preparing the same, and to prescribe the sanitary 1112conditions under which the work shall be performed." Id. Without such intervention, "a recrudescence of the abuses [that is, health and safety violations] is 1314absolutely certain." Id.

15The report accompanying the President's letter likewise emphasized the 16necessity of adding "government inspection" to slaughterhouses, explaining that 17only that sort of oversight could provide "assurance []that these meat-food products are wholesome and fit for food." Id. at 267-68. The report also raised concerns that 1819inadequate government oversight would result in inaccurate labeling that would 20deceive consumers. Id. "[T]he burden of protecting the cleanliness and 21wholesomeness of the products and the health of the workers and of improving the 22conditions under which the work is performed, must fall upon the National 23Government," the report authors urged. Id. at 265. Accordingly, they recommended the development of "Special Government inspection" to implement new rules on 24"cleanliness and wholesomeness," and that any government label of approval only 2526be permitted where a product has "been subject to Government inspection at any 27and every stage of the process of preparation." Id. at 270-271.

Further still, the letter and report came immediately on the heels of Upton
 Sinclair's *The Jungle*. David Greenberg, *How Teddy Roosevelt Invented Spin*, The
 Atlantic, Jan. 24, 2016. Sinclair "document[ed] the indifference of management" to
 the conditions of meatpacking workers and the animals alike, which he attributed
 to "the lack of government oversight." *Id*.

6 The congressional record confirms that the drafters of the FMIA, spurred by 7 Sinclair's exposure of horrid practices in slaughterhouses, meant to institute 8 independent federal oversight of the meat supply. See, e.g., Conditions at 161, 194, 9 346-47 (showing times where the Committee on Agriculture mentioned its 10 motivation from *The Jungle*). During the Committee hearings and debates, there was "no objection whatever" to the proposal that "Special Government inspection [] 1112be carried on continuously to prevent violations of the law and general abuses in the trade." Conditions at 30. Even the representative for Chicago packers testified, "We 1314have always felt that Government inspection, under proper regulations, was an 15advantage to the livestock and agricultural interests and to the consumer," Id. at 16 55, and that,

[H]ere is a measure for all the people. It is a health measure; it benefits the producers fully as much as ourselves, if not more. It benefits the consumer, and the expense should be apportioned over them; and I know no better way for that to be accomplished than through the Government.

Id. at 89. Congress agreed, with one member of the Committee on Agriculture
noting, "Now, I believe that every man in the hearing of my voice ... will
admit that there is only one kind of inspection that will fully answer the
requirements, and that is Government inspection." *Id.* at 200.

In short, the drafters of the FMIA intended to protect consumers from tainted
meat products through government supervision. "The rulemaking power granted to
an administrative agency charged with the administration of a federal statute ... is
the power to adopt regulations to carry into effect the will of Congress as expressed

28 Brief of Amici Curiae Case No. 4:20-cv-00256-JSW

17

18

by the statute." *Ernst & Ernst v. Hochfelder*, 425 U.S. 185, 213 (1976) (internal
 quotation marks omitted). Therefore, USDA rulemaking under the FMIA must have
 consumer protection through independent oversight at its core.

5

4

2. The NSIS turns over inspection to pork companies.

The NSIS privatizes much of the pork inspection regime and significantly
impedes what inspection does occur. It transfers federal inspection authority over
live animals presented for slaughter to company employees with insufficient
training, and limits federal inspectors' time to review meat products, both of which
place consumers at risk. In other words, the rules are not only inconsistent with the
ways Congress directed the FMIA be implemented, but also with the statute's
overarching goal of ensuring consumer confidence in a safe meat supply.

13The NSIS transfers live animal inspection to slaughterhouse-employed 14"sorters." 9 C.F.R. §§ 309.19(a) ("The establishment must conduct market hog sorting activities before the animals are presented for ante-mortem inspection."); 1516Guideline for Training Establishment Sorters under the New Swine Slaughter 17Inspection System, Food Safety and Inspection Serv., U.S. Dep't of Agric., 7-8 (Sept. 182019) (discussing ante-mortem plant-sorter duties), A-0426-0516. Where the FMIA 19 requires federal inspectors to conduct an ante-mortem "examination and inspection 20of all" swine "before they shall be allowed to enter" any U.S. abattoir, 21 U.S.C. § 21603(a), under the NSIS plant employee-sorters bear the duty of segregating live 22animals deemed to be healthy from those found to be sick. 84 Fed. Reg. 52,312. 23"FSIS inspectors [only] observe establishment employees performing [these] animal 24segregation procedures at least once per month." Id. Nonetheless — in direct 25contravention of the government's insistence federal inspectors continue to examine 26"each animal" in the same "careful" manner as before, Dkt. No. 68, at 9 — under the 27NSIS, federal inspectors rely on the plant sorting process to determine how they

proceed, only themselves "observ[ing] five to ten percent of those animals" sorted as 1 $\mathbf{2}$ healthy for slaughter "in motion." Modernization of Swine Slaughter Inspection, 83 3 Fed. Reg. 4780, 4792 (proposed Feb. 1, 2018) (describing the pilot program on which the NSIS is based). The government claims this is not problematic because FSIS 4 inspectors still view all of the animals "at rest." Dkt. No. 68, at 15, but it freely $\mathbf{5}$ 6 admits the objective of the sorting is to allow "fewer inspectors to do the same 7 work," Dkt. No. 68, at 9. In other words, it is reducing federal involvement by 8 relying on slaughterhouse employees' judgment to decrease federal inspectors' effort, a judgment that federal employees barely supervise. That is, it is not merely 9 increasing federal "efficien[cy]," as the government pretends, *id.* at 8, but 10 11 privatizing the inspection regime.

12In fact, the rules rely on plants to develop the training for their sorters, further diminishing federal oversight and consumer safety under the NSIS. 1314Guideline for Training Establishment Sorters under the New Swine Slaughter 15Inspection System 6; see also Modernization of Swine Slaughter Inspection, 84 Fed. Reg. 52,313 (Oct. 1, 2019) ("FSIS is not prescribing specific sorter training or 16 17certification."). The plants are merely provided optional training guidelines, and an English-only pamphlet of information.¹ See Guideline for Training Establishment 18 19 Sorters, *supra*. A study found that the plants devoted as few as two labor hours to 20training new staff and one hour provided for an annual "refresher" training. 21Catherine L. Viator, Costs of Food Safety Investments, RIT Int'l, 4-9 (May 2015). By 22comparison, federal inspectors receive extensive training. Audit Report 24601-0001-2341, Food Safety and Inspection Service – Inspection and Enforcement Activities At

24 25

¹ Meanwhile, about 38 percent of animal slaughtering and processing workers are foreign-born, and often do not speak English as a first language. Angela Stuesse and Nathan T. Dollar, *Who are America's meat and poultry workers?*, Econ. Pol'y Inst. (2020).

Swine Slaughter Plants, Off. Inspector Gen., 13 (May 2013), A-0103 [hereinafter
 "Audit Report"].

3 Finally, the NSIS both lifts the plants' line-speed limits and cuts online 4 (meaning on the meat inspection line) federal inspection staffing by more than half. Under the new rules, the plants are "allowed to have faster production line speeds $\mathbf{5}$ 6 with fewer FSIS inspectors," Id. at 19. The plants in the pilot project that led to 7 NSIS had an "average line speed [of] approximately 12.49 percent faster than comparable establishments," 84 Fed. Reg. 52,335, which "results in a 2.26-fold 8 *reduction* in average inspector time dedicated to performing a critical appraisal" of 9 10 meat products. Food & Water Watch, Comment Letter on Proposed Rule, Modernization of Swine Slaughter Inspection, 3 (May 2, 2018). Put simply, the 1112increased line speeds mean that more meat passes over a slaughter line in less time, reducing the amount of time federal inspectors have to address food safety 1314concerns. Reducing federal staffing further increases the amount of material an 15inspector must evaluate, leading to an expected doubling of the prior pace: "instead 16of inspecting an average of 163 heads per hour per inspector, ... each inspector 17would be tasked with inspecting an average of 366 slaughtered animals per hour." Food & Water Watch Comment, *supra*; see also, Modernization of Swine Slaughter 1819Inspection, 84 Fed. Reg. 52,300 (Oct. 1, 2019) (listing key elements of the NSIS, 20including the revocation of maximum line speeds and the reduction of FSIS staff to 21online inspection).

The NSIS rules mean that company-employed, minimally trained, plant sorters are now charged with protecting consumer health. The independent federal inspectors that the FMIA drafters envisioned would play that role are relegated to reviewing only a portion of the animals and glancing at the carcasses speeding by as they head towards consumers' plates.

28 Brief of Amici Curiae Case No. 4:20-cv-00256-JSW

3. Defendants' rules jeopardize consumer safety, and therefore are ultra vires and contrary to Congress's intent.

Academic and government research confirms that the changes made by the NSIS rules place consumers at meaningful risk. Specifically, statistical evidence shows that lack of training and faster line speeds increase error rates and the volume of contaminated meat in the food supply, and reports from inspectors and stakeholders show that the privatization of inspection duties undermines Congress's desired check on meat suppliers. To abide by congressional intent, the NSIS would need to protect consumers of meat products through government oversight; the new rules are proven to do just the opposite.

The government's own reports show that the absence of training for employee-sorters places consumers at risk. In their reports on the NSIS pilot project, the USDA Office of the Inspector General ("OIG") and the Government Accountability Office ("GAO") both noted several errors and areas of concern due to lack of training of employee-sorters. OIG reported that of the five pilot project plants, three had "some of the highest" rates of error nationwide. Audit Report, supra, at 19. As a result, the Office recommended increased training for the already extensively trained federal inspectors, warning "vague guidance as well as insufficient on-the-job training and supervision" increased the error rates and "reduced assurance that inspectors will effectively identify pork that should not enter the food supply," which must be all the truer for the poorly trained sorters. Id. at 12. The GAO echoed these fears, stating that the lack of training for employeesorters "raise[s] concerns about food safety and worker safety." More Disclosure and Data Needed to Clarify Impact of Changes to Poultry and Hog Inspections, Gov't. Accountability Off., unnumbered introductory page, 19, 22 (Aug. 2013), A-0135, A-0156, A-0159. Even the European Union raised concerns that because "[t]here is no specific requirement for training in animal health or husbandry prescribed in the Proposed Rule," they do not consider "establishment personnel" to be acceptably Brief of Amici Curiae Case No. 4:20-cv-00256-JSW

qualified. Dirk Lange, European Union, Comment Letter on Proposed Rule,
 Modernization of Swine Slaughter Inspection (May 2, 2018), A-0335-36.

3 Likewise, studies show that lifting line speed limits leads to more violations of food safety regulations. The increases in speed "create [] a pressurized 4 $\mathbf{5}$ environment in which workers are more likely to make a critical mistake and miss 6 'carcass contamination." Zoe Novic, Too Fast, Too Furious: Slaughterhouse Line 7 Speeds in The Era of Covid-19, Pub. Health Theses, Yale Sch. of Pub. Health (Jan. 8 2021), https://elischolar.library.yale.edu/ysphtdl/2083/. In fact, the rate of 9 noncompliance records ("NRs") – that is, citations for violations – for fecal matter, 10 digestive contents, and milk contamination was twice as high in the pilot project 11 ("HIMP") as traditional plants:

	Plant Type	Tasks Performed	Total NRs	NR Rate
	HIMP	8314	267	0.032114506
:	Non-HIMP	32499	586	0.018031324
	Others	12259	247	0.020148462

16 USDA data on fiscal years 2008 to 2011 (2018), released under the Freedom of 17Information Act (FOIA) to Food & Water Watch, A-0882. Indeed, the swine plant 18 with the most citations was a pilot project plant with increased speeds, Audit 19Report, *supra*, and *all* violations allowing carcasses that can cause food poisoning to 20enter the food supply occurred in the pilot project plants with the increased line 21speeds. Food & Water Watch Comment, *supra*, 12-13, A-0245-46. This is 22particularly troubling given that the lack of formal training for sorters makes it 23more "difficult for inspectors to be able to do this job." Name Redacted, Aff., 3 (Oct. 242014), A-0267.

Finally, numerous people have reported that through transferring
responsibilities to employee-sorters, the NSIS increases the risk that plants will be
able to manipulate food safety rules. A USDA inspector testified in the rulemaking

14

process that "company management is more production-oriented so they do not 1 $\mathbf{2}$ focus much on food safety and removing adulterated product. Actually, [company] 3 employees are discouraged from removing adulterated products from the line." Name 4 Redacted, Aff., *supra* (emphasis added). Moreover, research and advocacy organizations emphasized reports showing workers have voiced fears of retaliation $\mathbf{5}$ 6 to researchers. One organization explained, "in the likely event a worker does not 7 raise a concern because of the legitimate fear of retaliation," then federal inspectors 8 would be the last line of defense. Ctr. for Progressive Reform, Comment Letter on Proposed Rule, Modernization of Swine Slaughter Inspection (Apr. 30, 2018) (citing 9 10 a study from Nebraska Appleseed of 455 slaughterhouse workers), A-0343. Although focusing on post-mortem inspection, worker advocates explained that 1112FSIS inspectors do not face the same threat of retaliation as plant personnel because they are "employed independently, but the "establishment sorters ... are 1314directly dependent for their employment on the slaughter establishment" and thus 15cannot exercise their judgment freely. Ctr. for Science in the Pub. Interest, 16Comment Letter on Proposed Rule, Modernization of Swine Slaughter Inspection 17(May 2, 2018), A-0445. For the sorters, "the only line of defense would be the federal inspectors," but the NSIS decreases their presence in the plant. Id. This "place[s] a 1819much heavier burden on the remaining inspectors to ensure tainted food products 20do not enter into commerce." Ctr. for Progressive Reform Comment, supra.

The evidence establishes the NSIS directly undermines consumer safety, contrary to the clear-cut legislative directive. Shifting the meat inspection process from one overseen by trained, independent, federal employees to under- or untrained company sorters without any safety net, directly undermines the goals of the FMIA.

26

	Case 4:20-cv-00256-JSW Document 74 Filed 03/10/22 Page 19 of 20
1	Conclusion
2	Because Defendant's NSIS rules are <i>ultra vires</i> and contradict Congress's
3	intent in passing the FMIA, the Court should grant Plaintiffs' Motion for Summary
4	Judgment and vacate Defendants' New Swine Inspection System rules.
5
